

Brainstorming & Idea Prioritization Template

Date	27 June 2026
Team ID	SL-2026-02
Project Name	Smart Lender – Loan Eligibility Prediction Using Machine Learning
Maximum Marks	3 Marks

Step 1: Brainstorm and Idea Listing

Each team member lists out as many ideas as possible without judging them at this stage.

S.No	Team Member	Idea / Suggestion	Category	Group No.
1	Team Member 1	Collect loan applicant data from reliable sources and understand the dataset.	Data Collection	1
2	Team Member 2	Clean the dataset by handling missing values, duplicates, and outliers.	Data Preprocessing	1
3	Team Member 3	Perform feature engineering and data scaling to improve prediction accuracy.	Feature Engineering	2
4	Team Member 4	Train multiple Machine Learning models such as Decision Tree, Random Forest, and Logistic Regression.	Model Development	2
5	Team Member 5	Evaluate model performance using Accuracy, Precision, Recall, F1-Score, and Confusion Matrix.	Model Evaluation	3

6	Team Member 6	Deploy the final Smart Lender model as a user-friendly web application.	Deployment	3
---	---------------	---	------------	---

Step 2: Idea Prioritization

Rate each grouped idea on feasibility and importance, then select the final idea(s) to move forward with.

Group No.	Final Idea	Feasibility	Importance	Priority Selected	Group No.
1	Build a Machine Learning-based Smart Lender system for predicting loan eligibility.	High	High	Yes	1
2	Compare different ML algorithms and select the best-performing model.	High	High	Yes	2
3	Develop an interactive web application for real-time loan prediction.	Medium	High	Yes	3
