Project Name	Smart Lender – Loan Eligibility Prediction Using Machine Learning
Maximum Marks	4 Marks

Empathy Map

The primary users of the Smart Lender system are loan applicants who need a quick and accurate prediction of their loan eligibility.

SAYS - I want to know whether my loan will be approved before applying. - The loan approval process should be fast and transparent. - I don't want my application to be rejected due to avoidable mistakes.		THINKS - Do I meet the bank's eligibility criteria? - Will my income and credit history affect the approval? - Is there a quicker and more reliable way to predict loan approval?
	Vikram Patel <i>(Personal Loan Applicant)</i>	
DOES - Collects the required financial documents. - Enters personal and financial details into the application. - Compares different loan options before submitting the application.		FEELS - Anxious about loan rejection. - Confused by complex eligibility requirements. - Hopeful that technology can simplify the approval process.
