

Customer Journey Map

Date	30 June 2026
Team ID	SL-2026-02
Project Name	Smart Lender – Loan Eligibility Prediction Using Machine Learning
Maximum Marks	2 Marks

Phase of Journey	Stage 1	Stage 2	Stage 3
Actions <i>What does the customer do?</i>	- Visits the Smart Lender application. - Learns about loan eligibility requirements. - Prepares personal and financial details.	Enters applicant details into the system. - Submits the information for prediction. - Waits for the eligibility result.	Reviews the prediction result. - Understands the reasons for approval or rejection. - Proceeds with the loan application or improves eligibility.
Touchpoint <i>What part of the service do they interact with?</i>	Home page - Project overview - Eligibility guidelines	Input form - Machine Learning prediction module - Submit button	Prediction result page - Recommendation section - Loan application guidance
Customer Thought <i>What is the customer thinking?</i>	Will I qualify for a loan? - What information is required? - Is this process reliable?	I hope my details are sufficient. - Will my application be approved? - Is the prediction accurate?	What should I do next? - How can I improve my eligibility if rejected? - Can I confidently apply for the loan?

Customer Feeling <i>What is the customer feeling?</i>	Curious • Hopeful • Slightly uncertain	Anxious • Excited • Expectant	Relieved if approved • Motivated to improve if rejected • Confident about the next steps
Process Ownership <i>Who is in the lead on this?</i>	Customer & Smart Lender Web Application	Machine Learning Prediction System	Bank/Financial Institution & Customer
Opportunities <i>How can we improve this stage?</i>	Provide clear eligibility guidelines. • Improve user interface. • Offer document checklists.	Increase prediction accuracy. • Reduce processing time. • Validate user inputs automatically.	• Provide personalized recommendations. • Explain prediction results clearly. • Suggest ways to improve loan eligibility.

Customer Journey Map:

The Customer Journey Map illustrates the complete experience of a loan applicant while using the Smart Lender – Loan Eligibility Prediction System. It begins with the customer exploring the platform and understanding the loan eligibility criteria, followed by entering personal and financial information to receive a machine learning-based prediction. Finally, the customer reviews the prediction results and decides whether to proceed with the loan application or improve their eligibility.
