

Data Flow Diagram

Date	01 July 2026
Team ID	SL-2026-02
Project Name	Smart Lender – Loan Eligibility Prediction Using Machine Learning
Maximum Marks	2 Marks

Data Flow Diagram

Create a Data Flow Diagram (DFD) to show how data moves through your system - between external entities, processes, and data stores. Use the symbol legend below as a guide.

DFD Symbol Legend

Symbol	Name	Description (Smart Lender Project)
Oval / Rounded Shape	External Entity	Represents an external user or system that interacts with the Smart Lender application by providing or receiving information. Example: Loan Applicant, Bank Officer.
Rectangle with Numbered Header	Process	Represents a processing activity that transforms input data into meaningful output. Example: User Registration/Login, Validate Applicant Details, Loan Eligibility Prediction (ML Model), Display Prediction Result.
Rectangle (Solid Fill, No Number)	Data Store	Represents a storage location where information is saved for future use. Example: Applicant Database, Trained Machine Learning Model, Prediction Results Database.
Labeled Arrow	Data Flow	Represents the movement of data between external entities, processes, and data stores. Example: Registration Details, Applicant Information, Validated Input Data, Prediction Result, Loan Approval/Rejection Status.

Data Flow:**1. Loan Applicant → P1**

- Registration/Login Details

2. P1 → D1

- Store User Information

3. Loan Applicant → P2

- Personal, Financial, and Loan Details

4. P2 → P3

- Applicant Data

5. P3 → D1

- Verified Applicant Information

6. P3 → P4

- Validated Input Data

7. D2 → P4

- Trained Machine Learning Model

8. P4 → D3

- Loan Prediction Result

9. P5 ← D3

- Retrieve Prediction Result

10. P5 → Loan Applicant

- Loan Approval / Rejection Prediction

Example:

The diagram below illustrates how the symbols above come together to form a complete data flow diagram.
