

Problem-Solution Fit

Date	04 July 2026
Team ID	SL-2026-02
Project Name	Smart Lender – Loan Eligibility Prediction Using Machine Learning
Maximum Marks	5 Marks

Problem-Solution Fit Canvas:

Use the framework below to ensure your proposed solution accurately addresses the root causes, behaviors, and limitations of your target audience. Fill out the canvas in the respective boxes just like the original visual template.

1. CUSTOMER SEGMENT(S) [CS] • Individuals applying for personal, education, home, or vehicle loans. • Banks and financial institutions. • Loan officers and credit analysts. • FinTech companies providing digital lending services.	6. CUSTOMER LIMITATIONS EG. BUDGET, DEVICES [CL] • Limited financial knowledge. • Incomplete documentation. • Limited internet access in some regions. • Low-end devices with limited computing resources.	5. AVAILABLE SOLUTIONS PROS & CONS [AS] Existing Solutions: Manual verification, rule-based banking systems. Pros: Easy to understand, widely used. Cons: Slow processing, inconsistent decisions, limited scalability, prone to human errors.
--	---	--

2. PROBLEMS / PAINS + ITS FREQUENCY [PR]

- Manual loan eligibility assessment is time-consuming.
- High risk of human error and bias.
- Slow approval process leading to customer dissatisfaction.
- Frequent rejection due to inaccurate eligibility assessment.

9. PROBLEM ROOT / CAUSE [RC]

- Manual verification consumes significant time.
- Traditional systems rely on fixed rules.
- Large volume of loan applications.
- Difficulty in accurately assessing applicant eligibility using conventional methods.

7. BEHAVIOR + ITS INTENSITY [BE]

- Users expect instant eligibility results.
- Frequently compare loan options online.
- Prefer digital banking services over manual visits.
- High demand for quick and accurate predictions.

3. TRIGGERS TO ACT [TR]

- Customer submits a loan application.
- Need for quick loan approval.
- Increasing number of online loan applications.
- Demand for automated decision-making in banks.

10. YOUR SOLUTION [SL]

Smart Lender – Loan Eligibility Prediction Using Machine Learning uses historical applicant data and machine learning algorithms to predict loan eligibility instantly. The system preprocesses applicant information, evaluates key financial factors, and provides fast, accurate, and unbiased loan approval predictions through a user-friendly Flask web application, helping financial institutions improve efficiency and customer satisfaction.

8. CHANNELS OF BEHAVIOR [CH]

ONLINE:

Bank websites, mobile banking apps, loan portals, FinTech platforms.

OFFLINE:

Bank branches, financial consultants, customer service centers.

4. EMOTIONS BEFORE / AFTER [EM]

Before: Anxiety, uncertainty, frustration, long waiting time.
After: Confidence, transparency, satisfaction, faster loan decisions.
